Shareholder Letter Q2 FY2026

Siemens Energy Investor Relations

Dear shareholders,

following another strong quarter, Siemens Energy pre-released its preliminary results and raised its FY26 outlook on April 23, 2026. On May 12, Christian Bruch, President and CEO, and Maria Ferraro, CFO, presented the Group's final results for the second quarter of fiscal year 2026.

"Our strong market momentum continues despite geopolitical uncertainty, leading to another exceptionally strong quarter and first half of the fiscal year. Our raised outlook reflects our confidence that these developments will continue, as well as in our resilience and project execution", says Christian Bruch.

Siemens Energy delivered record order levels, driven in particular by strong demand in the U.S., **resulting in a record order backlog and broad-based improvements across all key performance indicators** compared with the prior-year quarter.

Siemens Energy achieved a new all-time high in orders of €17.7bn driven by another record level of orders at Gas Services and a sharp increase in Grid Technologies year-over-year. Book-to-bill ratio (ratio of orders to revenue) was 1.72, and **order backlog reached €154bn for the quarter.**

On a comparable basis (excluding currency translation and portfolio effects), **revenue increased by 8.9% to €10.3bn year-over-year**, supported by all segments.

Profit before Special items rose substantially to €1,164m year-over-year (Q2 FY 2025: €906m), mainly due to the profit improvement at Siemens Gamesa. **Special items amounted to negative €55m** (Q2 FY 2025: negative €291m). **Siemens Energy's Profit came in at €1,109m (**Q2 FY 2025: €615m).

Net income also increased sharply to €835m (Q2 FY 2025: €501m). Corresponding **basic earnings per share amounted to €0.89** (Q2 FY 2025: €0.50).

Free cash flow pre tax increased to €1,975m (Q2 FY2025: €1,390m). The sharp increase followed the profit improvement and was also strongly supported by customer advance payments related to the high level of orders.

Based on the positive business development, **Siemens Energy raised its outlook for fiscal year 2026**. Siemens Energy now expects for the Group to achieve comparable revenue growth in a range of 14% to 16% and a Profit margin before Special items between 10% and 12%. Siemens Energy now expects a Net income of around €4bn. Also, the outlook for Free cash flow pre tax for the fiscal year 2026 was raised to around €8bn.

Building on our strong cash position, **Siemens Energy is accelerating its share buyback program by up to €1bn** in FY2026. Combined with around €2bn already repurchased since March 2026, this increases **shareholder returns for fiscal year 2026 to up to €3.6bn incl. dividends**.

On the following pages, we provide further details on the share buyback program and introduce our new AI Lab in Orlando.

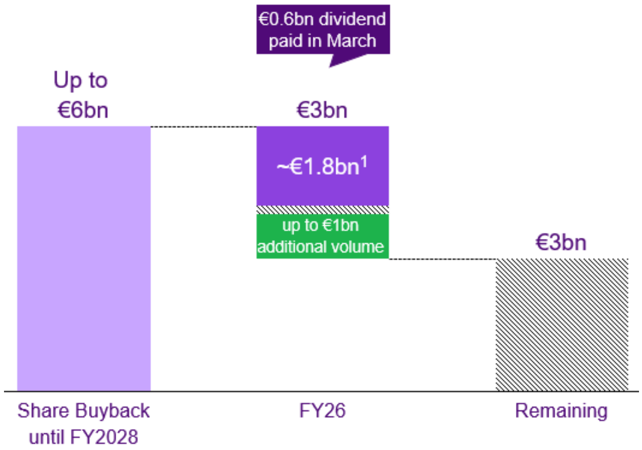
Up to €3bn share buyback in FY2026

FY2026 shareholder returns increase to up to €3.6bn incl. dividends

On May 12, Siemens Energy announced the **acceleration of its up to €6bn share buyback program through FY2028**, originally introduced at the Capital Markets Day in November 2025. As part of this step-up, **the nearly completed first €2bn tranche will be increased by up to €1bn in FY2026**.

This acceleration underscores both the strength of Siemens Energy's financial performance and its clear commitment to disciplined, shareholder-focused capital allocation. Supported by improved profitability and strong cash generation, we **have raised our full-year free cash flow expectations to around €8bn**.

Including the dividend already paid earlier in the fiscal year, **shareholder returns for FY2026 are now expected to reach approximately €3.6bn**.



The decision is firmly supported by operational momentum across the business. Strong order intake, a highly visible backlog, and improving margin quality continue to drive advance payments and cash inflows. Importantly, cash generation is increasingly supported by structural improvements in profitability and business quality, rather than temporary working capital effects.

Our approach to capital allocation remains clear and consistent. **We are committed to maintaining a balanced framework that prioritizes investments in growth, particularly in capacity expansion and digitalization, while at the same time delivering attractive and sustainable returns to our shareholders.** The acceleration of the share buyback demonstrates our confidence in the long-term earnings potential of the business and our ability to generate substantial cash flows over the coming years.

Looking ahead, we will continue to assess the appropriate pace and scale of capital returns in line with business performance and market conditions. **With a strong balance sheet, a clear growth trajectory, and improving profitability, Siemens Energy is well positioned to create sustainable value and deliver attractive returns to its shareholders.**

Grid Technologies AI Lab in Orlando

Opened to transform grid operations

In parallel to the strong operational execution in Grid Technologies, the Business Area continues to invest in digital capabilities to further enhance the value proposition for customers and support long-term margin expansion. A key milestone in this regard is the launch of the dedicated **Grid Technologies AI Lab in Orlando**, which has been established in close collaboration with partners such as NVIDIA. This initiative **combines Siemens Energy's deep domain expertise with advanced AI infrastructure**, enabling the development of real-time insights, digital twins and predictive models for increasingly complex grid systems.

At the core of this digital strategy is the rollout of the new Noedra software suite, which introduces an integrated intelligence layer to modern grid infrastructure. The platform comprises four key modules: **Noedra Shield**, which provides end-to-end cybersecurity and compliance, **Noedra Flow**, which optimizes transmission through real-time analytics and dynamic capacity management, **Noedra Node**, which transforms substations into intelligent, self-monitoring assets and **Noedra Atlas**, which supports long-term grid planning and system optimization.

Together, these applications **allow customers to operate their infrastructure more efficiently, increase reliability, and manage growing complexity** driven by electrification, renewable integration and rising power demand.

At the same time, **the digital layer enhances the scalability of the installed base and enables recurring, higher-margin revenue streams over time.**

This strengthens Grid Technologies' positioning not only as a provider of critical hardware, but increasingly as a partner delivering integrated, data-driven energy solutions.

1 Repurchased volume as of May 8, 2026

Financial outlook raised

Fiscal Year 2026

	FY2026 outlook			
	Revenue growth[1]		Profit margin before SI[2]	
Gas Services	16 – 18%	*(unchanged)*	14 – 16 %	*(unchanged)*
Grid Technologies	↗ 25 – 27%	*(prev. 19 – 21%)*	↗ 18 – 20 %	*(prev. 16 – 18%)*
Transformation of Industry	5 – 7%	*(unchanged)*	11 – 13 %	*(unchanged)*
Siemens Gamesa	↗ 3 – 5%	*(prev. 1 – 3%)*	Break-even	*(unchanged)*
Siemens Energy	↗ **14 – 16%**	***(prev. 11 – 13%)***	↗ **10 – 12 %**	***(prev. 9 – 11%)***
Net Income	↗ ~€4bn	*(prev. €3bn – €4bn)*		
Free Cash Flow pre tax[3]	↗ ~€8bn	*(prev. €4bn – €5bn)*		

This outlook excludes charges related to any future legal and regulatory matters.

1 Comparable revenue growth: Excluding currency translation and portfolio effects | **2** Profit margin in % of revenue with profit as earnings before financial result, income taxes, amortization expenses related to intangible assets acquired in business combinations, and goodwill impairments | **3** Free cash flow pre tax as operating cash flow less purchase of intangibles assets and property, plant and equipment and less Income taxes paid

Information and Forward-Looking Statements

This document contains statements related to our future business and financial performance, and future events or developments involving Siemens Energy that may constitute forward-looking statements. These statements may be identified by words such as “expect,” “look forward to,” “anticipate” “intend,” “plan,” “believe,” “seek,” “estimate,” “will,” “project,” or words of similar meaning. We may also make forward-looking statements in other reports, prospectuses, in presentations, in material delivered to shareholders, and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens Energy’s management, of which many are beyond Siemens Energy’s control. These are subject to a number of risks, uncertainties, and other factors, including, but not limited to, those described in disclosures, in particular in the chapter “Report on expected developments and associated material opportunities and risks” in the Annual Report. Should one or more of these risks or uncertainties materialize, should acts of force majeure, such as pandemics, occur, or should underlying expectations including future events occur at a later date or not at all, or should assumptions prove incorrect, Siemens Energy’s actual results, performance, or achievements may (negatively or positively) vary materially from those described explicitly or implicitly in the relevant forward-looking statement. Siemens Energy neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated. This document includes supplemental financial measures – that are not clearly defined in the applicable financial reporting framework – and that are or may be alternative performance measures (non-GAAP-measures). These supplemental financial measures should not be viewed in isolation or as alternatives to measures of Siemens Energy’s net assets and financial position or results of operations as presented in accordance with the applicable financial reporting framework in its consolidated financial statements. Other companies that report or describe similarly titled alternative performance measures may calculate them differently. Due to rounding, numbers presented throughout this and other documents may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.“
