Adjusted earnings drivers for the full year 2022, as compared with 2021, were higher revenues associated with rates and pricing at the company's regulated utilities, warmer weather, customer growth and increased usage, partially offset by higher non-fuel operations and maintenance costs, reflecting a rising cost environment and long-term commitments to reliability and resilience, along with higher interest expense.

Fourth-quarter 2022 operating revenues were $7.0 billion, compared with $5.8 billion for the fourth quarter of 2021, an increase of 22.2 percent. Operating revenues for the full year were $29.3 billion, compared with $23.1 billion in 2021, an increase of 26.7 percent. These increases were primarily due to higher fuel costs.

"Southern Company enjoyed another successful year in 2022," declared Chairman, President and CEO, Thomas A. Fanning. "This is due in no small part to the hard work of employees on a daily basis to provide customers with clean, safe, reliable and affordable energy."

"Significantly, our Operations team, generation fleet and power delivery system performed exceedingly well in 2022," added Fanning. "This included meeting an all-time peak load of over 41,000 megawatts in June, and an extremely frigid Christmas weekend that pushed electric demand to a winter peak of nearly 38,000 megawatts – a December record for our service footprint."

(2) Earnings for the three and twelve months ended December 31, 2022 include a charge of $201 million pre tax ($150 million after tax) and net charges of $183 million pre tax ($137 million after tax), respectively, and earnings for the three and twelve months ended December 31, 2021 include charges of $920 million pre tax ($686 million after tax) and $1.692 billion pre tax ($1.261 billion after tax), respectively, for estimated probable losses on Georgia Power Company's construction of Plant Vogtle Units 3 and 4. Further charges and credits may occur; however, the amount and timing are uncertain. Earnings for the three and twelve months ended December 31, 2022 and 2021 also include charges (net of salvage proceeds), associated legal expenses (net of insurance recoveries), and tax impacts related to Mississippi Power Company's integrated coal gasification combined cycle facility project in Kemper County, Mississippi. Mississippi Power Company expects to incur additional pre-tax period costs to complete dismantlement of the abandoned gasifier-related assets and site restoration activities, including related costs for compliance and safety, asset retirement obligation accretion, and property taxes, net of salvage, totaling approximately $15 million annually through 2025.

(3) Earnings for the three and twelve months ended December 31, 2022 include impairment charges totaling $131 million pre-tax ($99 million after-tax) and other disposition impacts associated with the sales of Southern Company Gas' natural gas storage facilities. Further impacts may result from future acquisition and disposition activities; however, the amount and timing of any such impacts are uncertain.

(4) Earnings for the twelve months ended December 31, 2021 include results of the Wholesale Gas Services business. Presenting earnings and earnings per share excluding Wholesale Gas Services provided an additional measure of operating performance that excluded the volatility resulting from mark-to-market and lower of weighted average cost or current market price accounting adjustments.
