

Fourth Quarter 2021 Earnings Conference Call

January 25, 2022

Safe Harbor Statement

Some of our comments and materials in this presentation constitute forward-looking statements that reflect management's current views and estimates of future economic circumstances, industry conditions, Company performance and financial results.

These statements and materials are based on many assumptions and factors that are subject to risk and uncertainties. ADM has provided additional information in its reports on file with the SEC concerning assumptions and factors that could cause actual results to differ materially from those in this presentation, and you should carefully review the assumptions and factors in our SEC reports.

To the extent permitted under applicable law, ADM assumes no obligation to update any forward-looking statements as a result of new information or future events.

Additional Facts and Explanations

A chef wearing a dark apron is stirring a pot of orange soup on a portable stove. The kitchen counter is filled with fresh vegetables like celery, carrots, and parsley. A red cup and a glass of orange juice are also visible. A horizontal bar with green, purple, blue, and orange segments is positioned below the title.

⁽¹⁾ Non-GAAP measure – see notes on page 28

Notes: Non-GAAP Reconciliation

The Company uses certain “Non-GAAP” financial measures as defined by the Securities and Exchange Commission. These are measures of performance not defined by accounting principles generally accepted in the United States, and should be considered in addition to, not in lieu of, GAAP reported measures.

- (1) **Adjusted net earnings and Adjusted earnings per share (EPS)**
Adjusted net earnings reflects ADM’s reported net earnings after removal of the effect on net earnings of specified items as more fully described above. Adjusted EPS reflects ADM’s fully diluted EPS after removal of the effect on EPS as reported of specified items as more fully described above. Management believes that Adjusted net earnings and Adjusted EPS are useful measures of ADM’s performance because they provide investors additional information about ADM’s operations allowing better evaluation of underlying business performance and better period-to-period comparability. These non-GAAP financial measures are not intended to replace or be alternatives to net earnings and EPS as reported, the most directly comparable GAAP financial measures, or any other measures of operating results under GAAP. Earnings amounts described above have been divided by the company’s diluted shares outstanding for each respective period in order to arrive at an adjusted EPS amount for each specified item.
- (2) **Segment operating profit and adjusted segment operating profit**
Segment operating profit is ADM’s consolidated income from operations before income tax excluding corporate items. Adjusted segment operating profit, a non-GAAP measure, is segment operating profit excluding specified items. Management believes that segment operating profit and adjusted segment operating profit are useful measures of ADM’s performance because they provide investors information about ADM’s business unit performance excluding corporate overhead costs as well as specified items. Segment operating profit and adjusted segment operating profit are not measures of consolidated operating results under U.S. GAAP and should not be considered alternatives to income before income taxes, the most directly comparable GAAP financial measure, or any other measure of consolidated operating results under U.S. GAAP.
- (3) **Adjusted Return on Invested Capital (ROIC)**
Adjusted ROIC is Adjusted ROIC earnings divided by adjusted invested capital. Adjusted ROIC earnings is ADM’s net earnings adjusted for the after-tax effects of interest expense, changes in the LIFO reserve and other specified items. Adjusted invested capital is the sum of ADM’s equity (excluding noncontrolling interests) and interest-bearing liabilities adjusted for the after-tax effect of the LIFO reserve, and other specified items. Management believes Adjusted ROIC is a useful financial measure because it provides investors information about ADM’s returns excluding the impacts of LIFO inventory reserves and other specified items and increases period-to-period comparability of underlying business performance. Management uses Adjusted ROIC to measure ADM’s performance by comparing Adjusted ROIC to its weighted average cost of capital (WACC). Adjusted ROIC, Adjusted ROIC earnings and Adjusted invested capital are non-GAAP financial measures and are not intended to replace or be alternatives to GAAP financial measures.
- (4) **Average ROIC**
Average ROIC is ADM’s trailing 4-quarter net earnings adjusted for the after-tax effects of interest expense and changes in the LIFO reserve divided by the sum of ADM’s equity (excluding non-controlling interests) and interest-bearing liabilities adjusted for the after-tax effect of the LIFO reserve. Management uses average ROIC for investors as additional information about ADM’s returns. Average ROIC is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
- (5) **Adjusted Economic Value Added**
Adjusted economic value added is ADM’s trailing 4-quarter economic value added adjusted for specified items. The Company calculates economic value added by comparing ADM’s trailing 4-quarter adjusted returns to its Annual WACC multiplied by adjusted invested capital. Adjusted economic value added is a non-GAAP financial measure and is not intended to replace or be an alternative to GAAP financial measures.
- (6) **Adjusted EBITDA**
Adjusted EBITDA is ADM’s earnings before interest, taxes, depreciation, and amortization, adjusted for specified items. The Company calculates adjusted EBITDA by removing the impact of specified items and adding back the amounts of interest expense and depreciation and amortization to earnings before income taxes. Management believes that adjusted EBITDA is a useful measure of the Company’s performance because it provides investors additional information about the Company’s operations allowing better evaluation of underlying business performance and better period to period comparability. Adjusted EBITDA is a non-GAAP financial measure and is not intended to replace or be an alternative to earnings before income taxes, the most directly comparable GAAP financial measure.
- (7) **FX Adjusted Revenue**
FX adjusted revenue is ADM’s GAAP revenue adjusted for the impact of fluctuations in foreign currency exchange rates. The Company calculates FX adjusted revenue by converting its current period revenue using the prior period exchange rates and comparing the adjusted amount to its prior period reported results. Management believes providing FX adjusted revenue provides valuable supplemental information regarding its revenue and facilitates period-to-period comparison. FX adjusted revenue is a non-GAAP measure and is not intended to replace or be an alternative to GAAP revenues, the most directly comparable GAAP financial measure.
