DÜSSELDORF, MARCH 04, 2021

This presentation contains forward-looking statements. Forward-looking statements may include, in particular, statements about future events, future financial performance, plans, strategies, expectations, prospects, competitive environment, regulation and supply and demand. Statements with respect to the future are characterized by the use of words such as "expect", "intend", "plan", "anticipate", "believe", "estimate" and similar terms. Forward-looking statements are based on our current assumptions and forecasts. These statements naturally entail risks and uncertainties, which may cause the actual results of operations, financial position or performance to diverge materially from the estimates given here. Factors that could cause such a divergence include, inter alia, changes in the economic and business environment, fluctuations in exchange rates and interest rates, launches of competing products, poor acceptance of new products or services, and changes in business strategy. Given these uncertainties, readers should not put undue reliance on any forward-looking statements. We undertake no obligation to update or revise any forward-looking statements.

Due to rounding, the sum of percentages of order intake and sales by region as well as by customer industry may vary from 100%.

ROCE ^{1,2}	17.1%	10.6%	6.5%p
Net liquidity	402	28	374 €m

Decline mostly related to the customer industries Food and Beverages as well as orders >€5m

Execution of construction contracts impacted by Covid-19 related restrictions; service and product sales less impacted

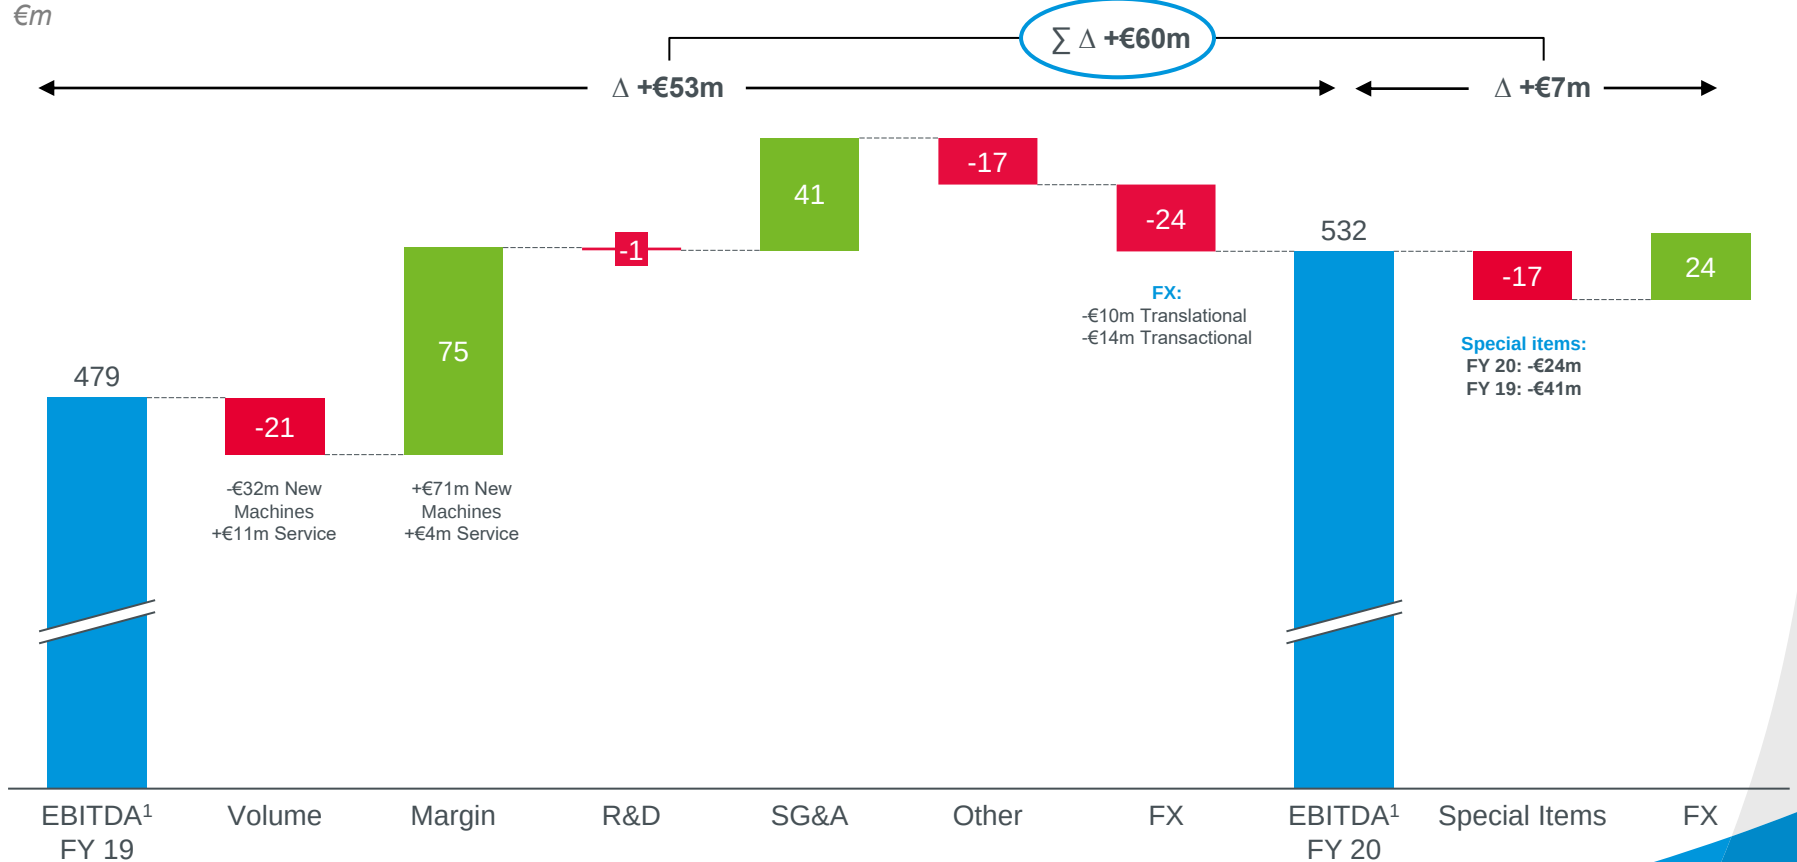

EBITDA¹ and margin improvement driven by higher gross profit margin as well as lower overhead costs resulting from cost savings initiatives implemented earlier

Substantial increase based on improvement of both, EBIT^{1,2} and Capital Employed²

Significant improvement of net liquidity especially driven by a strong reduction of net working capital

¹ Before restructuring; ² L4Q

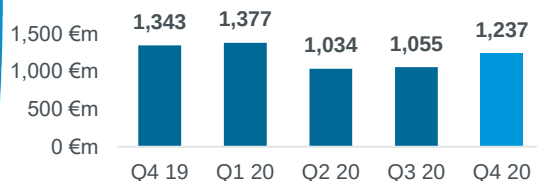

EBITDA¹ supported by significant improvements of margin and lower SG&A costs

¹ Before restructuring measures
GEA Q4 2020 Figures

GEA Group:
Orders below prior
year's level but
improved
sequentially;
EBITDA¹ margin
expansion from
better gross
margin and lower
overhead costs

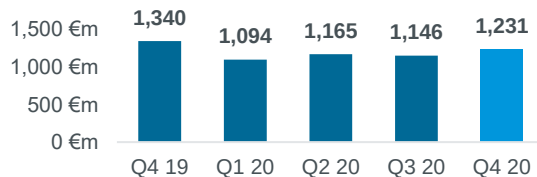

Order Intake

Order intake declined by 7.9% YoY (org. -4.0%)

- Decline mostly driven by lower intake of large orders (>€15m)
- Significant sequential improvement of order momentum across all key customer industries except for Pharma

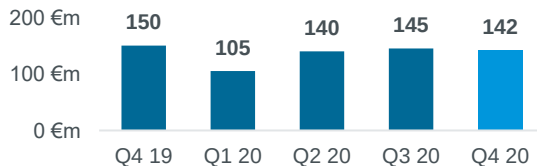

Sales

Sales declined by 8.2% YoY (org. -4.1%)

- Covid-19 related restrictions impacted order execution
- Organic flat service sales (0.3%) – share of service sales increased to 34.1% (vs. 32.7% in Q4 19)

EBITDA¹

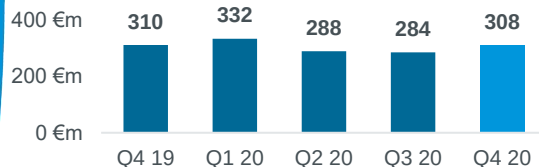

EBITDA¹ margin increased to 11.5%

- Margin expansion was driven by higher gross margin as well as lower overhead costs

¹ Before restructuring measures

Separation & Flow Technologies: EBITDA¹ margin expansion despite Covid-19 related top-line decline

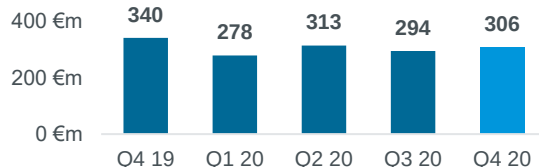

Order Intake

Order intake down by 0.6% YoY (org. +4.0%)

- Weaker orders in the customer industry Food were compensated by growth in the customer industries Dairy Processing, Environmental and Pharma

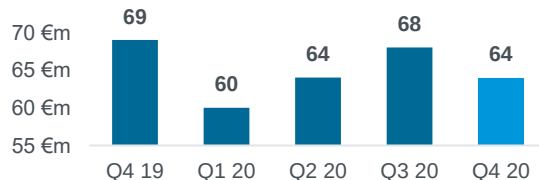

Sales

Sales declined by 9.8% YoY (org. -5.8%)

- Decline mainly related to Oil & Gas industry
- Service sales increased by 3.2% organically; share of total sales rose to a new record level of 44.2% (vs. 40.4% in Q4 19)

EBITDA¹

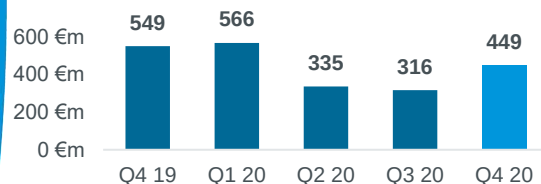

EBITDA¹ margin increased to 20.9%

- Volume-driven decline in gross profit was partly compensated by lower overhead costs

¹ Before restructuring measures

Liquid & Powder Technologies: Significant sequential improvement in order intake momentum

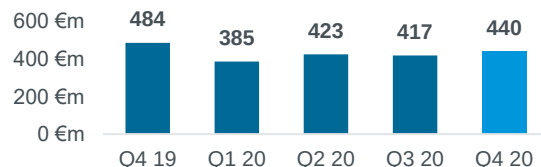

Order Intake

Order intake declined by 18.1% YoY (org. -15.4%)

- YoY decrease due a record level in large order (>€15m) intake in Q4 19
- Significant sequential improvement especially in Dairy Processing, Food and Beverages

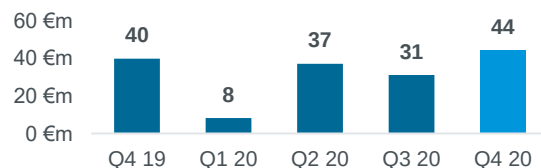

Sales

Sales declined by 9.1% YoY (org. -5.4%)

- Covid-19 related restrictions still weigh on order execution
- Service sales down by 7.0% organically; share of total sales 23.4% (vs. 23.8% in Q4 19)

EBITDA¹

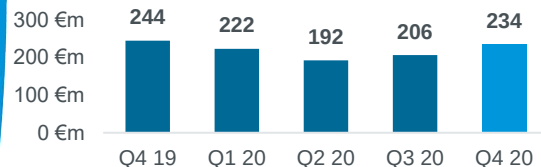

EBITDA¹ margin improved to 9.9%

- Higher gross margin from better order execution more than compensated a slight increase of overhead costs

¹ Before restructuring measures

Food & Healthcare
Technologies:
EBITDA¹ margin
expansion driven
by higher gross
margin and lower
overhead costs

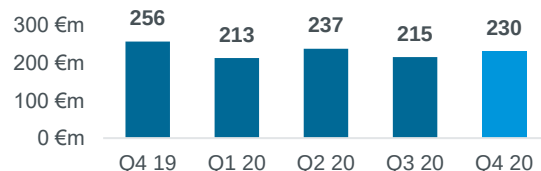

Order Intake

Order intake down by 4.3% YoY (org. -2.8%)

- Pharma business slightly up versus prior year while Food was down driven by some project delays
- Customer activity in some customer industries is improving

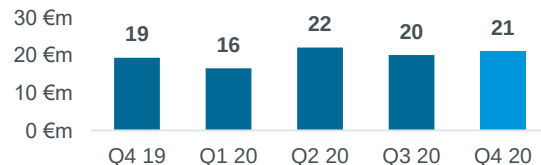

Sales

Sales declined by 10.1% YoY (org. -8.6%)

- Delays in order execution and commissioning due to restrictions related to Covid-19
- Organic service sales growth of 3.4% - now accounting for 28.2% of sales (vs. 25.0% in Q4 19)

EBITDA¹

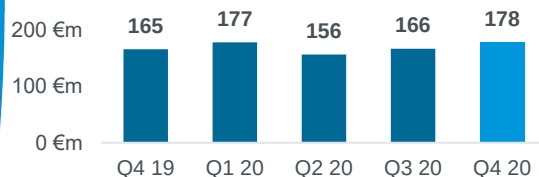

EBITDA¹ margin improved to 9.1%

- Gross margin expanded while overhead costs were below last year's level

¹ Before restructuring measures

Farm Technologies: Positive order intake trend continued in Q4 20

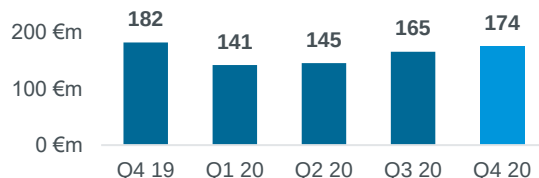

Order Intake

Order intake up by 7.6% YoY (org. +16.5%)

- Demand driven by automated milking systems
- Good demand from North America, Germany and Russia

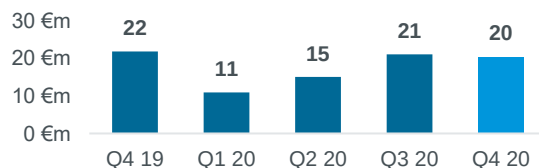

Sales

Sales declined by 4.4% YoY (org. +2.6%)

- New machines sales negatively impacted by a discontinued barn equipment product line
- Organic service sales rose by 4.5% - service sales share now at 43.2% (vs. 42.7% in Q4 19)

EBITDA¹

EBITDA¹ margin declined slightly to 11.4%

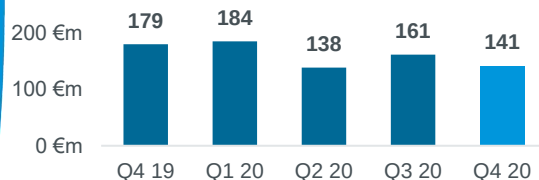

- Decline in gross profit could not be compensated by overhead costs

¹ Before restructuring measures

Refrigeration Technologies: Order intake, sales and EBITDA¹ impacted by Covid-19

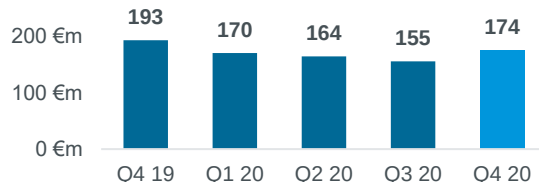

Order Intake

Order intake decline of 21.3% YoY (org. -17.7%)

- Decline due to postponements of orders especially in the project business
- Pent-up demand from earlier in 2020 was awarded to a certain degree in Q3 20

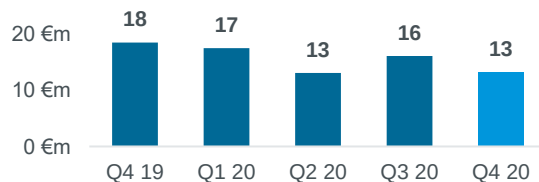

Sales

Sales declined by 9.8% YoY (org. -5.2%)

- Lower backlog at the start of Q4 20 due to weaker order intake in Q2 and Q3 20
- Organic service sales declined by 3.7%; service sales share at 36.6% (vs. 35.7% in Q4 19)

EBITDA¹

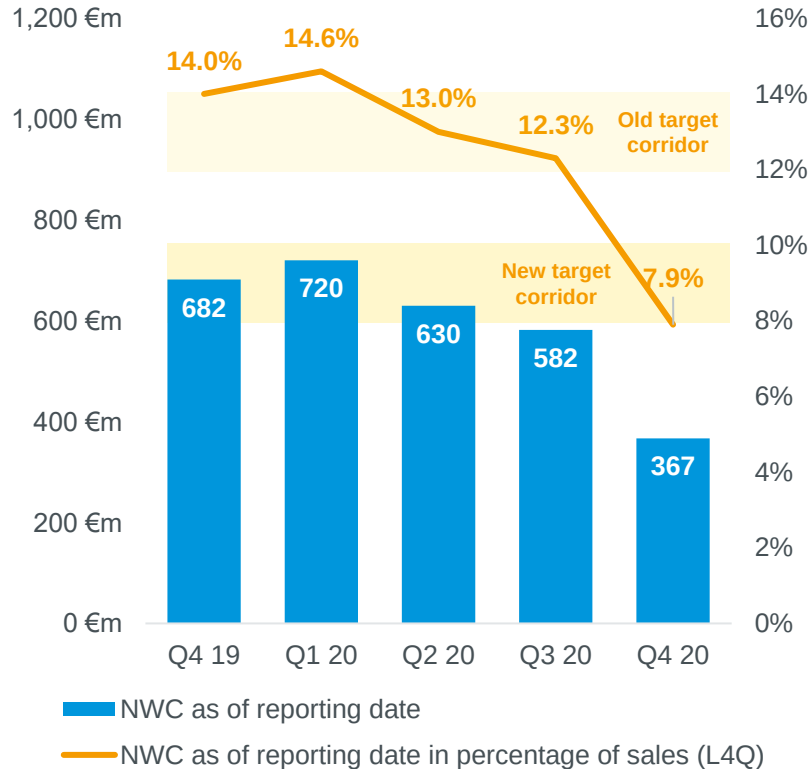

EBITDA¹ margin declined to 7.4%

- Gross margin improved but gains were offset by stronger increase in overhead costs

¹ Before restructuring measures

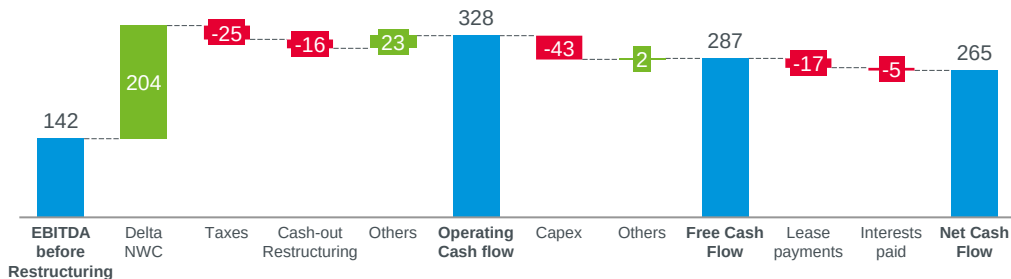

NWC/Sales ratio further strongly reduced to a new record low of 7.9%

- NWC improvement of €315m YoY or 6.1%p
- Reduction of NWC across all divisions but especially at Separation & Flow as well as Liquid & Powder Technologies
- YoY improvement due to trade receivables, net contract assets and inventories while trade payables decreased
- **Sustainable improvement of net working capital achieved**
- **New NWC/Sales target range of 8% to 10%**

Strong net cash position of €402m at the end of Q4 2020

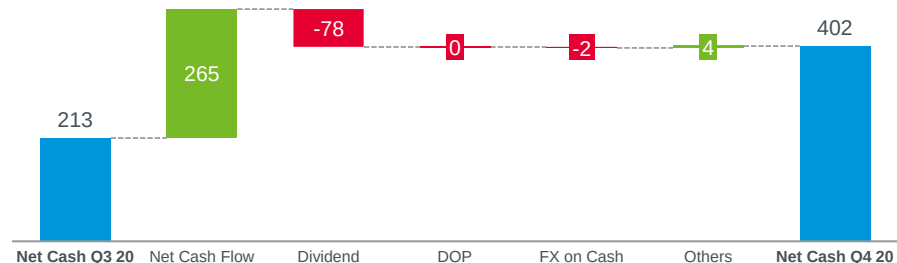

Free Cash Flow Q4 [€m]

Operating Cash Flow

- **NWC €204m:** Improvements from better inventory and payables
- **Restructuring** related cash outflow of -€16m
- **Others €23m:** includes restructuring provisions for the relocation of the valves & pumps production as well as provisions for personnel, bad debt, service costs and the disposal of assets

Net financial cash Q4 20 vs. Q3 20 [€m]

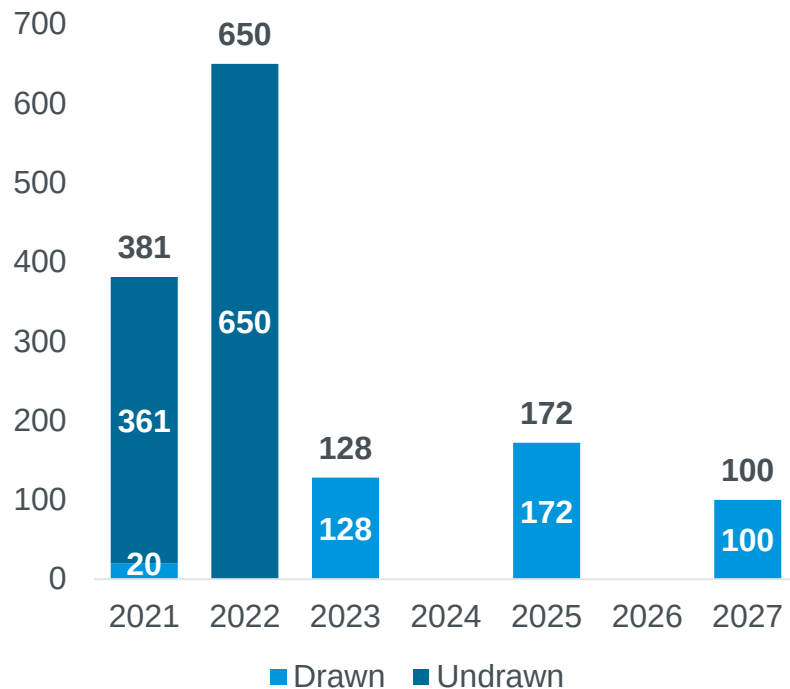

Net financial cash

- **Dividend -€78m** 2nd tranche paid in December
- **FX on cash -€2m**, mainly Indian Rupee and Argentine Peso

Strong financial position and sufficient financial headroom

Split-up of “Zebra” entities ahead of schedule, leading to higher transparency

- **Until Dec 2020:**

Individual legal entities/companies (“Zebras”) with activities related to two or more divisions were allocated to just one division

- **From 1 Jan 2021:**

Split up of “Zebras” into single profit centers which are now allocated by their different business activity to the respective division

This leads to higher transparency at division level but has no impact on group level
