This presentation contains forward-looking statements. Forward-looking statements may include, in particular, statements about future events, future financial performance, plans, strategies, expectations, prospects, competitive environment, regulation and supply and demand. Statements with respect to the future are characterized by the use of words such as "expect", "intend", "plan", "anticipate", "believe", "estimate" and similar terms. Forward-looking statements are based on our current assumptions and forecasts. These statements naturally entail risks and uncertainties, which may cause the actual results of operations, financial position or performance to diverge materially from the estimates given here. Factors that could cause such a divergence include, inter alia, changes in the economic and business environment, fluctuations in exchange rates and interest rates, launches of competing products, poor acceptance of new products or services, and changes in business strategy. Given these uncertainties, readers should not put undue reliance on any forward-looking statements. We undertake no obligation to update or revise any forward-looking statements.

Due to rounding, the sum of percentages of order intake and sales by region as well as by customer industry may vary from 100%.

Key developments

ESG

- Prime Status in ISS ESG Corporate Rating¹
- Launch of climate strategy & commitment to net-zero by 2040
- Signing of UN Global Compact
- Refrigeration Technologies joining the UNEP (UN Environment Programme) Cool Coalition

FOOTPRINT

Cornerstone laid for GEA's future climate-neutral production facility in Koszalin, Poland

PORTFOLIO

Agreement signed to sell refrigeration contracting businesses in Spain and Italy

¹ On July 15, 2021, GEA received 'Prime Status' (leadership in its industry index group) in the ISS ESG Corporate Rating

Pro-active approach with key suppliers to manage cost increase and availability

Material cost increase

- Passing on price increases where possible e. g. with additional price rounds
- Delaying material price increases into the future
- Using design-to-cost measures
- **Additional cost increases are expected, and countermeasures implemented**

Supply chain shortages

- Managing inventory pro-actively in cooperation with the suppliers
- **Lead times will further increase**

Logistic costs rising

- Logistic costs were partly mitigated by optimizing the supplier structure
- Significant parts of the packaging cost increases were passed on
- **Further increases of logistic costs are expected and countermeasures implemented**

Total impact from cost increases of up to €25m reflected in our EBITDA¹ guidance of €600m to €630m
