Notes:

- Adjusted revenues is used by Cigna's management because it permits analysis of trends in underlying revenue. The Company defines adjusted revenues as total revenues excluding the following adjustments: special items and Cigna's share of certain realized investment results of its joint ventures reported in the International Markets segment using the equity method of accounting. Special items are matters that management believes are not representative of the underlying results of operations due to their nature or size. We exclude these items from this measure because management believes they are not indicative of**

past or future underlying performance of the business. Adjusted revenues is not determined in accordance with GAAP and should not be viewed as a substitute for the most directly comparable GAAP measure, total revenues. See Exhibit 1 for a reconciliation of consolidated adjusted revenues to total revenues.

2. **Adjusted income (loss) from operations is a principal financial measure of profitability used by Cigna's management because it presents the underlying results of operations of Cigna's businesses and permits analysis of trends in underlying revenue, expenses and shareholders' net income. Adjusted income from operations is defined as shareholders' net income (or income before taxes for the segment metric) excluding net realized investment results, amortization of acquired intangible assets and special items. Cigna's share of certain realized investment results of its joint ventures reported in the International Markets segment using the equity method of accounting are also excluded. Special items are matters that management believes are not representative of the underlying results of operations due to their nature or size. Adjusted income (loss) from operations is measured on an after-tax basis for consolidated results and on a pre-tax basis for segment results. Consolidated adjusted income (loss) from operations is not determined in accordance with GAAP and should not be viewed as a substitute for the most directly comparable GAAP measure, shareholders' net income. See Exhibit 1 for a reconciliation of consolidated adjusted income from operations to shareholders' net income.**
3. **Management is not able to provide a reconciliation of adjusted income from operations to shareholders' net income (loss) or adjusted revenues to total revenues on a forward-looking basis because it is unable to predict, without unreasonable effort, certain components thereof including (i) future net realized investment results (from equity method investments with respect to adjusted revenues) and (ii) future special items. These items are inherently uncertain and depend on various factors, many of which are beyond Cigna's control. As such, any associated estimate and its impact on shareholders' net income and total revenues could vary materially.**

The Company's outlook excludes the potential effects of any business combinations that may occur after the date of this earnings release. The Company's outlook includes the potential effects of expected future share repurchases and anticipated 2021 dividends.

As announced in January 2021, Cigna currently intends to pay regular quarterly dividends, with future declarations subject to approval by its Board of Directors and the Board's determination that the declaration of dividends remains in the best interests of Cigna and its shareholders. The decision of whether to pay future dividends and the amount of any such dividends will be based on the Company's financial position, results of operations, cash flows, capital requirements, the requirements of applicable law and any other factors the Board of Directors may deem relevant.

The timing and actual number of shares repurchased will depend on a variety of factors, including price, general business and market conditions, and alternate uses of capital. The share repurchase program may be effected through open market purchases in compliance with Rule 10b-18 under the Securities Exchange Act of 1934, as amended, including through Rule 10b5-1 trading plans, or privately negotiated transactions. The program may be suspended or discontinued at any time.

4. **Operating ratios are defined as follows:**
 - **Medical care ratio represents medical costs as a percentage of premiums for all U.S. Commercial risk products, including medical, pharmacy, dental, stop loss and behavioral products provided through guaranteed cost or experience-rated funding arrangements, as well as Medicare Advantage, Medicare Part D, Medicare Supplement, Medicaid, and individual on and off-exchange products, within Cigna's U.S. Medical segment.**

- SG&A expense ratio represents enterprise selling, general and administrative expenses excluding special items as a percentage of adjusted revenue at a consolidated level.
5. Customer relationships are defined as follows:
 - Total medical customers includes individuals in Cigna's U.S. Medical and International Markets segments who meet any one of the following criteria: are covered under a medical insurance policy, managed care arrangement, or service agreement issued by Cigna; have access to Cigna's provider network for covered services under their medical plan; or have medical claims and services that are administered by Cigna.
 - Pharmacy customer relationships. Effective January 1, 2021, Pharmacy lives have been updated to reflect actual eligibility data for benefits provided to Prime Therapeutics. Previously these lives had been estimated based on prescriptions filled during the period. Pharmacy lives for prior periods have been restated to reflect this change.
 - International Markets medical customers excludes medical customers served by less than 100% owned subsidiaries.
 - International Markets supplemental policies exclude International Markets medical customers included in total medical customers.
 - Total customer relationships excludes covered lives associated with the Group Disability and Life business that was sold on December 31, 2020.
 6. Cigna owns a 50% non-controlling interest in its China joint venture. Cigna's 50% share of the joint venture's earnings is reported in Fees and Other Revenues using the equity method of accounting under GAAP. As such, the adjusted revenues and policy counts for the International Markets segment do not include the China joint venture.
 7. Adjusted margin, pre-tax, is calculated by dividing adjusted income (loss) from operations, pre-tax by adjusted revenues for each segment.
 8. For Evernorth adjusted pharmacy scripts, non-specialty network scripts filled through 90-day programs and home delivery scripts are multiplied by three. All other network and specialty scripts are counted as one script.
 9. Medical costs payable within the U.S. Medical segment are presented net of reinsurance and other recoverables. The gross medical costs payable balance was \$3.85 billion as of September 30, 2021, \$3.18 billion as of December 31, 2020, and \$3.20 billion as of September 30, 2020.
 10. Beginning first quarter 2021, in our earnings release and quarterly financial supplement "Corporate and Other Operations" combines the results previously reported as "Corporate" and the segment previously reported as "Group Disability and Other", which is now reported as "Other Operations" in our securities filings. This change to simplify reporting was enabled by the sale of the Group Disability and Life business.
