**Marathon Petroleum Corp. Reports First-Quarter 2023 Results**

- **First-quarter net income attributable to MPC of \$2.7 billion, or \$6.09 per diluted share; adj. EBITDA of \$5.2 billion**
- **Net cash provided by operating activities of \$4.1 billion, reflecting strong execution**
- **Commenced STAR project operations; progressed Martinez Renewable Fuels facility into Phase II**
- **Returned \$3.5 billion of capital through \$3.2 billion of share repurchases and \$337 million of dividends**
- **Announced additional \$5 billion share repurchase authorization**

FINDLAY, Ohio, May 2, 2023 – Marathon Petroleum Corp. (NYSE: MPC) today reported net income attributable to MPC of \$2.7 billion, or \$6.09 per diluted share, for the first quarter of 2023, compared with net income attributable to MPC of \$845 million, or \$1.49 per diluted share, for the first quarter of 2022.

Adjusted earnings before interest, taxes, depreciation, and amortization (adjusted EBITDA) was \$5.2 billion for the first quarter of 2023, compared with \$2.6 billion for the first quarter of 2022.

“Our first-quarter results reflect strong operational and commercial execution across the company,” said President and Chief Executive Officer Michael J. Hennigan. “The business generated \$4.1 billion of net cash provided by operating activities in the first quarter. We continue to enhance our portfolio, including the Galveston Bay STAR project, which successfully commenced operations in April and the Martinez Renewables facility, which continues to progress Phase II. We returned over \$3.5 billion through share repurchases and dividends during the quarter.”

## Results from Operations

### Refining & Marketing (R&M)

Segment adjusted EBITDA was \$3.9 billion in the first quarter of 2023, versus \$1.4 billion for the first quarter of 2022. Refining and Marketing segment adjusted EBITDA was \$15.09 per barrel for the first quarter of 2023, versus \$5.39 per barrel for the first quarter of 2022. Segment adjusted EBITDA excludes refining planned turnaround costs, which totaled \$357 million in the first quarter of 2023 and \$145 million in the first quarter of 2022. The increase in segment adjusted EBITDA was driven by higher R&M margins.

R&M margin was \$26.15 per barrel for the first quarter of 2023, versus \$15.31 per barrel for the first quarter of 2022. Crude capacity utilization was approximately 89%, driven by planned maintenance activity in the Gulf Coast region, resulting in total throughput of 2.8 million barrels per day for the first quarter of 2023.

Refining operating costs per barrel were \$5.68 for the first quarter of 2023, versus \$5.22 for the first quarter of 2022. This increase was primarily driven by higher expenses for projects conducted during turnaround activity.

### Midstream

Segment adjusted EBITDA was \$1.5 billion in the first quarter of 2023, versus \$1.4 billion for the first quarter of 2022, as growth in throughputs and higher rates more than offset lower natural gas liquids prices.

### Corporate and Items Not Allocated

Corporate expenses totaled \$184 million in the first quarter of 2023, compared with \$151 million in the first quarter of 2022.

## Financial Position, Liquidity, and Return of Capital

As of March 31, 2023, MPC had \$11.5 billion of cash, cash equivalents, and short-term investments and \$5 billion available on its bank revolving credit facility.

In the first quarter, the company returned \$3.5 billion of capital through \$3.2 billion of share repurchases and \$337 million of dividends. And, in April, the company repurchased \$1.2 billion of company shares.

Additionally, the Board of Directors has approved an incremental \$5 billion share repurchase authorization. With the addition of this new authorization, the company has a total of \$9.0 billion available under its share repurchase authorization. The authorization has no expiration date. MPC may utilize various methods to effect the repurchases, which could include open market repurchases, negotiated block transactions, accelerated share repurchases, tender offers or open market solicitations for shares, some of which may be effected through Rule 10b5-1 plans. The timing of repurchases will depend upon several factors, including market and business conditions, and repurchases may be discontinued at any time.

## Strategic and Operations Update

The Martinez Renewable Fuels facility reached full Phase I production capacity of 260 million gallons per year of renewable fuels, ramping to design rates and yields as planned. Phase II construction activities are on schedule. Pretreatment capabilities are expected to come online in the second half of 2023, and the facility is expected to be capable of producing 730 million gallons per year by the end of 2023.

At its Galveston Bay refinery, the company completed the STAR project, which is expected to add 40,000 barrels per day of incremental crude capacity and 17,000 barrels per day of resid processing capacity. Start-up activities are progressing with utilization expected to increase throughout the second quarter of 2023.

The Midstream segment remains focused on executing the strategic priorities of strict capital discipline, fostering a low-cost culture, and optimizing the portfolio. MPLX is advancing growth projects anchored in the Marcellus, Permian and Bakken basins.

## Second Quarter 2023 Outlook

### Refining & Marketing Segment:

|                                                    |    |       |
|----------------------------------------------------|----|-------|
| Refining operating costs per barrel <sup>(a)</sup> | \$ | 5.20  |
| Distribution costs (in millions)                   | \$ | 1,350 |
| Refining planned turnaround costs (in millions)    | \$ | 400   |
| Depreciation and amortization (in millions)        | \$ | 480   |

### Refinery throughputs (mbpd):

|                              |              |
|------------------------------|--------------|
| Crude oil refined            | 2,645        |
| Other charge and blendstocks | 215          |
| Total                        | <u>2,860</u> |

|                         |    |     |
|-------------------------|----|-----|
| Corporate (in millions) | \$ | 175 |
|-------------------------|----|-----|

<sup>(a)</sup> Excludes refining planned turnaround and depreciation and amortization expense

## Conference Call

At 11:00 a.m. ET today, MPC will hold a conference call and webcast to discuss the reported results and provide an update on company operations. Interested parties may listen by visiting MPC's website at [www.marathonpetroleum.com](http://www.marathonpetroleum.com). A replay of the webcast will be available on the company's website for two weeks. Financial information, including the earnings release and other investor-related materials, will also be available online prior to the conference call and webcast at [www.marathonpetroleum.com](http://www.marathonpetroleum.com).

###

## About Marathon Petroleum Corporation

Marathon Petroleum Corporation (MPC) is a leading, integrated, downstream energy company headquartered in Findlay, Ohio. The company operates the nation's largest refining system. MPC's marketing system includes branded locations across the United States, including Marathon brand retail outlets. MPC also owns the general partner and majority limited partner interest in MPLX LP, a midstream company that owns and operates gathering, processing, and fractionation assets, as well as crude oil and light product transportation and logistics infrastructure. More information is available at [www.marathonpetroleum.com](http://www.marathonpetroleum.com).

| Inter-region refinery transfers excluded from throughput and yields above (mbpd) | 45                              | 59    |

(a) Includes intersegment sales.

(b) Based on calendar day capacity, which is an annual average that includes downtime for planned maintenance and other normal operating activities.

**Refining & Marketing - Supplemental Operating Data by Region (unaudited)**

The per barrel for Refining & Marketing margin is calculated based on net refinery throughput (excludes inter-refinery transfer volumes). The per barrel for the refining operating costs, refining planned turnaround costs and refining depreciation and amortization for the regions, as shown in the tables below, is calculated based on the gross refinery throughput (includes inter-refinery transfer volumes).

Refining operating costs exclude refining planned turnaround costs, refining depreciation and amortization expense.

## Non-GAAP Financial Measures

Management uses certain financial measures to evaluate our operating performance that are calculated and presented on the basis of methodologies other than in accordance with GAAP. The non-GAAP financial measures we use are as follows:

### Adjusted EBITDA

Amounts included in net income (loss) attributable to MPC and excluded from adjusted EBITDA include (i) net interest and other financial costs; (ii) provision/benefit for income taxes; (iii) noncontrolling interests; (iv) depreciation and amortization; (v) refining planned turnaround costs and (vi) other adjustments as deemed necessary, as shown in the table below. We believe excluding turnaround costs from this metric is useful for comparability to other companies as certain of our competitors defer these costs and amortize them between turnarounds.

Adjusted EBITDA is a financial performance measure used by management, industry analysts, investors, lenders, and rating agencies to assess the financial performance and operating results of our ongoing business operations. Additionally, we believe adjusted EBITDA provides useful information to investors for trending, analyzing and benchmarking our operating results from period to period as compared to other companies that may have different financing and capital structures. Adjusted EBITDA should not be considered as a substitute for, or superior to income (loss) from operations, net income attributable to MPC, income before income taxes, cash flows from operating activities or any other measure of financial performance presented in accordance with GAAP. Adjusted EBITDA may not be comparable to similarly titled measures reported by other companies

## Refining & Marketing Margin

Refining & Marketing margin is defined as sales revenue less cost of refinery inputs and purchased products. We believe this non-GAAP financial measure is used to evaluate our Refining & Marketing segment's operating and financial performance as it is the most comparable measure to the industry's market reference product margins. This measure should not be considered a substitute for, or superior to, Refining & Marketing gross margin or other measures of financial performance prepared in accordance with GAAP, and our calculations thereof may not be comparable to similarly titled measures reported by other companies.
