- 1,201 total customers with over \$1 million in annual contract value, representing 25% year-over-year growth

SANTA CLARA, Calif. - July 28, 2021 - ServiceNow (NYSE: NOW), the leading digital workflow company making work, work better for people, today announced financial results for its second quarter ended June 30, 2021, with subscription revenues of \$1,330 million in Q2 2021, representing 31% year-over-year growth, 27% adjusted for constant currency.

As of June 30, 2021, current remaining performance obligations ("cRPO"), contract revenue that will be recognized as revenue in the next 12 months, was \$4.7 billion, representing 34% year-over-year growth, 31% adjusted for constant currency. The company now has 1,201 total customers with more than \$1 million in annual contract value, representing 25% year-over-year growth in customers.

"I'm so proud of our team's performance, significantly exceeding the high end of our guidance across all metrics, which is reflected in our strong full-year guidance raise," said Bill McDermott, ServiceNow president and CEO. "Business leaders worldwide are facing 'do or die' moments in a forever changed world. They are leveraging the flexibility of the Now Platform to create innovative digital solutions needed to solve the biggest challenges of our time. In partnership with our customers, we workflow a better world."

ServiceNow CFO Gina Mastantuono said, “Q2 was a tremendous quarter, showcasing the power of our business model and our ability to drive a balance of growth and profitability. The team demonstrated exceptional execution, and we saw strong demand across all regions and workflows. We are the platform for digital business, and we are well on our way to becoming a \$15+ billion revenue company.”

During the quarter, ServiceNow hosted Knowledge 2021, where customers, partners, and developers from 141 countries came together to address how they are using digital workflows to grow their business, become more resilient, and reshape their industries. At Knowledge 21, ServiceNow released new solutions to power the manufacturing and healthcare and life sciences industries by helping customers increase their agility, resilience, and productivity. In Q2, the company also acquired next-generation observability leader Lightstep to help customers accelerate digital transformation with insight-driven, action-oriented workflows. To support customers as they prepare for a hybrid workplace, ServiceNow recently announced an integration with Microsoft’s new Windows 365 solution to let users easily access Cloud PCs directly through Microsoft Teams. The company also launched enhancements to its Workplace Service Delivery solution to give customers consumer-grade employee experiences and optimize real estate planning, enabling productivity and flexibility in the new world of work.

Statement Regarding Use of Non-GAAP Financial Measures

We report the following non-GAAP financial measures in addition to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP.

- **Adjusted revenues.** We present revenues adjusted for constant currency to provide a framework for assessing how our business performed excluding the effect of foreign currency rate fluctuations. To present this information, current period results for entities reporting in currencies other than U.S. Dollars (“USD”) are converted into USD at the average exchange rates in effect during the comparison period (for Q2 2020, the average exchange rates in effect for our major currencies were 1 USD to 1.10 Euros and 1 USD to 1.24 British Pound Sterling (“GBP”), rather than the actual average exchange rates in effect during the current period (for Q2 2021, the average exchange rates in effect for our major currencies were 1 USD to 1.20 Euros and 1 USD to 1.40 GBP). We believe the presentation of revenues adjusted for constant currency facilitates the

comparison of revenues year-over-year.

- Billings and Adjusted billings. We define subscription billings, professional services and other billings, and total billings as the applicable revenue plus the applicable change in deferred revenue, unbilled receivables and customer deposits as presented or derived from the statement of cash flows. We adjust billings for constant currency, as described above, and for constant duration by replacing the portion of multi-year billings in excess of twelve months during the current period with the portion of multi-year billings in excess of twelve months during the comparison period. We believe these adjustments facilitate greater comparability in our billings information year-over-year. We believe billings is one indicator of the performance of our business.
- Adjusted remaining performance obligations and current remaining performance obligations. We present cRPO and remaining performance obligations ("RPO") and related growth rates adjusted for constant currency, as described above, to provide a framework for assessing how our business performed. We believe the presentation of cRPO and RPO and related growth rates adjusted for constant currency facilitates the comparison of cRPO and RPO year-over-year, respectively.
- Gross profit, Income from operations, Net income and Net income per share - diluted. Our non-GAAP presentation of gross profit, income from operations, and net income measures exclude certain non-cash or non-recurring items, including stock-based compensation expense, amortization of debt discount and issuance costs related to our convertible senior notes, loss on early note conversions, amortization of purchased intangibles, legal settlements, business combination and other related costs, and the related income tax effect of these adjustments. The non-GAAP weighted-average shares used to compute our non-GAAP net income per share - diluted excludes the dilutive effect of the in-the-money portion of convertible senior notes as they are covered by our note hedges, and includes the dilutive effect of time-based stock awards, the dilutive effect of warrants and the potentially dilutive effect of our stock awards with performance conditions not yet satisfied at forecasted attainment levels to the extent we believe it is probable that the performance condition will be met. We believe these adjustments provide useful supplemental information to investors and facilitates the analysis of our operating results and comparison of operating results across reporting periods.
- Free cash flow. Free cash flow is defined as net cash provided by (used in) operating activities plus cash paid for legal settlements, repayments of convertible senior notes attributable to debt discount and business combination and other related costs including compensation expense, reduced by purchases of property and equipment. Free cash flow margin is calculated as free cash flow as a percentage of total revenues. We believe information regarding free cash flow and free cash flow margin provides useful information to investors because it is an indicator of the strength and performance of our business operations.

Our presentation of non-GAAP financial measures may not be comparable to similar measures used by other

companies. We encourage investors to carefully consider our results under GAAP, as well as our supplemental non-GAAP information and the reconciliation between these presentations, to more fully understand our business. Please see the tables included at the end of this release for the reconciliation of GAAP and non-GAAP results.

Use of Forward-Looking Statements

This release contains “forward-looking statements” regarding our performance, including but not limited to statements in the section entitled “Financial Outlook.” Forward-looking statements are subject to known and unknown risks and uncertainties and are based on potentially inaccurate assumptions that could cause actual results to differ materially from those expected or implied by the forward-looking statements. If any such risks or uncertainties materialize or if any of the assumptions prove incorrect, our results could differ materially from the results expressed or implied by the forward-looking statements we make.

Factors that may cause actual results to differ materially from those in any forward-looking statements include: (i) the continued impact and duration of COVID-19 on our business, future financial performance and global economic conditions including the effectiveness, extent and duration of mitigation efforts such as “shelter in place”, availability of vaccinations and similar directives; (ii) our ability to compete successfully against existing and new competitors, (iii) our ability to comply with evolving privacy laws, data transfer restrictions, and other foreign and domestic standards related to data and the Internet, (iv) our ability to predict, prepare for and respond promptly to rapidly evolving technological, market and customer developments, (v) errors, interruptions, delays, or security breaches in or of our service or data centers, (vi) our ability to grow our business, including converting remaining performance obligations into revenue, adding and retaining customers, selling additional subscriptions to existing customers, selling to larger enterprises, government and regulated organizations with complex sales cycles and certification processes, and entering new geographies and markets, (vii) our ability to develop and gain customer acceptance of new and improved products and services, including those acquired through strategic transactions, and (viii) material changes in the value of foreign currencies relative to the U.S. Dollar. Additionally, these forward-looking statements involve risk, uncertainties and assumptions, including those related to the continued impacts of COVID-19 on our business, future financial performance and global economic conditions. Many of these assumptions relate to matters that are beyond our control and changing rapidly, including, but not limited to, the timeframes for and severity of social distancing and other mitigation requirements, the timing of headwinds from COVID-19, the continued impact of COVID-19 on new or existing customers’ purchasing decisions and the length of our sales cycles, renewal timing or billings terms, particularly for customers in certain industries highly affected by COVID-19. Significant variation from the assumptions underlying our forward-looking statements could cause our actual results to vary, and the impact could be significant.

Further information on these and other factors that could affect our financial results are included in our Form 10-K

filed for the year ended December 31, 2020, our Form 10-Q that will be filed for the quarter ended June 30, 2021 and in other filings we make with the Securities and Exchange Commission from time to time.

We undertake no obligation, and do not intend, to update these forward-looking statements, to review or confirm analysts' expectations, or to provide interim reports or updates on the progress of the current financial quarter.
