- *PPNR - Pre-provision net revenue is a non-GAAP measure that adjusts net income determined in accordance with GAAP to exclude the impact of the provision for credit losses and provision for income taxes. Adjusted pre-provision net revenue is a non-GAAP measure that additionally excludes securities gains (losses), restructuring charges, and other selected items. Truist's management calculated these measures based on Truist's continuing operations. Truist's management believes these measures provide a greater understanding of ongoing operations and enhance comparability of results with prior periods.*
- *Tangible Common Equity and Related Measures - Tangible common equity and related measures, including ROTCE and TBVPS, are non-GAAP measures that exclude the impact of intangible assets, net of deferred taxes, and their related amortization. These measures are useful for evaluating the performance of a business consistently, whether acquired or developed internally. Truist's management uses these measures to assess profitability, returns relative to balance sheet risk, and shareholder value.*

A reconciliation of each of these non-GAAP measures to the most directly comparable GAAP measure is included in the appendix to Truist's First Quarter 2025 Earnings Presentation, which is available at <https://ir.truist.com/earnings>.
