CEO Commentary

"We delivered a strong first quarter, with earnings per share up 25% from the first quarter of 2025, driven by disciplined execution against our strategic priorities and continued momentum across the franchise.

We continued to build new client relationships, grow in attractive markets, and generate high-quality loan and deposit growth that is translating into improved profitability.

We also maintained strong asset quality metrics, returned capital to shareholders at an accelerated pace, and continued to invest in scalable technology to better serve our clients and operate more efficiently.

With continued execution against our strategic priorities, we are establishing a long-term ROTCE target of 16% to 18%. This reflects both the progress we've made thus far and our confidence in the durability and scalability of our strategy."

Non-GAAP Financial Information

This news release contains financial information and performance measures determined by methods other than in accordance with GAAP. Truist's management uses these "non-GAAP" measures in their analysis of Truist's performance and the efficiency of its operations. Management believes these non-GAAP measures provide a greater understanding of ongoing operations, enhance comparability of results with prior periods and demonstrate the effects of significant items in the current period. Truist believes a meaningful analysis of its financial performance requires an understanding of the factors underlying that performance. These disclosures should not be viewed as a substitute for financial measures determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies. Below is a listing of the types of non-GAAP measures used in this news release:

- *Taxable-Equivalent Measures - Taxable equivalent revenue, taxable equivalent interest income, taxable equivalent net interest income, and taxable equivalent net interest margin include a taxable equivalent adjustment utilizing the federal income tax rate of 21% for certain tax-exempt instruments. Truist's management uses these measures in their analysis of Truist's performance. Truist's management believes these measures provide a greater understanding of ongoing operations and enhance comparability of results with prior periods.*
- *PPNR - Pre-provision net revenue is a non-GAAP measure that adjusts net income determined in accordance with GAAP to exclude the impact of the provision for credit losses and provision for income taxes. Truist's management calculated this measure based on Truist's continuing operations. Truist's management believes this measure provides a greater understanding of ongoing operations and enhances comparability of results with prior periods.*
- *Tangible Common Equity and Related Measures - Tangible common equity, average tangible common equity, and related measures, including ROTCE and TBVPS, are non-GAAP measures that exclude the impact of intangible assets, net of deferred taxes, and their related amortization. These measures are useful for evaluating the performance of a business consistently, whether acquired or developed internally. Truist's management uses these measures to assess profitability, returns relative to balance sheet risk, and shareholder value.*

Truist does not provide reconciliations for forward-looking non-GAAP financial measures because it is unable to provide a meaningful or accurate calculation or estimation of reconciling items and the information is not available without unreasonable effort. This is due to the difficulty of forecasting the occurrence and the financial impact of various items that have not yet occurred, are out of Truist's control, or cannot be reasonably predicted. For the same reasons, Truist is unable to address the probable significance of the unavailable information.

Reconciliations of these non-GAAP measures to the most directly comparable GAAP measures are included in this release or Truist's First Quarter 2026 Quarterly Performance Summary, which is available at <https://ir.truist.com/earnings>.

Reconciliations of these non-GAAP measures to the most directly comparable GAAP measures are included in the Non-GAAP Reconciliations section of this Quarterly Performance Summary or within the table above for TE measures. Net interest margin - TE is calculated using net interest income on a TE basis to determine the total yield on interest-earning assets.

(2) Amounts related to interest income and yields are on a TE basis, which represents a non-GAAP measure, utilizing the federal income tax rate of 21% for the periods presented. Interest income includes certain fees, deferred costs, and dividends. A reconciliation of net interest income - TE to net interest income is included within the table above. NIM - TE is calculated using net interest income on a TE basis to determine the total yield on interest-earning assets.

(3) Includes cash equivalents, interest-bearing deposits with banks, FHLB stock, and other earning assets.
